EXPERIENCE

TikTok

iOS Software Engineer

January 2025 – Present

- **Owned iOS planning and delivery of key TikTok Subscription features** (subscriber-only stories, premium playlists) and contributed to subscriber-only video preview and photos with extended preview, supporting a \$XXM/quarter business that exceeded its quarterly GMV target by 10%.
- **Proposed and led two performance initiatives** for subscriber-only content consumption and key subscription surfaces, each shipping to 100% of users and driving ~8% higher subscription purchases per DAU in experiment groups; ensured stability of revenue-critical systems for 1B+ users through robust event monitoring, A/B testing, and code review strategies.
- **Independently shipped MCP tools for TikTok's iOS AI ecosystem** that surface code ownership for specific modules, files, and directories, streamlining cross-engineer collaboration.
- **Core iOS contributor to a cross-org migration** of TikTok's Subscriptions platform, enabling parallel ownership across business teams.

Spotify

Mobile Engineer Intern

June 2023 – August 2023

- **Drove iOS development of a profile-sharing feature aimed at increasing profile traffic**, launched globally to Spotify's iOS userbase (600M+ MAU).
- **Built a Java backend service** returning users' shared Blends, and **drove the Swift implementation** of a profile-page feature that surfaces shared Blends when visiting a connection's profile. Wrote 25+ Java and Swift unit tests covering the new code paths.

EyeLabs.AI

iOS Intern

February 2023 – June 2023

- **Designed and implemented custom UI components and user-friendly search flow in SwiftUI** for the IOL Reference iOS app, allowing optical surgeons to quickly search for FDA approved, currently marketed intraocular lenses that meet their needs and specifications.

PERSONAL PROJECTS & SKILLS

DoubleDown ([Try on TestFlight](#)) — Open Beta

February 2026 – Present

SwiftUI (frontend), TypeScript/PostgreSQL/Redis/Express (backend)

- **Built a polished SwiftUI iOS blackjack app** with real-time multiplayer, casino-style animations, haptics, and push notifications. Designed *The Dojo*, an in-app training system with daily flashcards, strategy drills, and practice hands with local performance tracking to help users improve over time.
- **Designed and deployed an event-sourced TypeScript/Express backend on PostgreSQL and Redis**, enabling server-authoritative game state, real-time synchronization, and reliable multiplayer sessions.

Skills: Swift, SwiftUI, UIKit, Objective-C, CocoaPods, Bazel, Swift Concurrency, Liquid Glass, TypeScript, React, PostgreSQL, Redis, Docker, Git, A/B Testing, Unit Testing

EDUCATION

Washington University in St. Louis

September 2020 – May 2024

- **Majors:** Philosophy-Neuroscience-Psychology (Cognitive Neuroscience), Computer Science
- **GPA:** 3.7/4.0
- **Awards and Honors:** Graduated with honors, Dean's List Spring 2021, Fall 2021, Fall 2022, & Fall 2023
